Career Objective

A dedicated and results-oriented **MEAN stack developer** with **3.5+ years** of experience in building scalable and high-performing web applications using Angular, Node.js, Express, and MariaDB. Proficient in designing intuitive front-end interfaces, developing robust back-end APIs, and ensuring seamless integration across all layers of the stack. Experienced in leading cross-functional teams, optimizing code for performance, and adhering to best practices for project delivery. Passionate about leveraging technical expertise to drive innovation, solve complex challenges, and contribute to the success of a forward-thinking organization committed to excellence in web development.

Work Experience

✓ Software Engineer

Chenoa a 3Pillar Global Company

Mumbai, Maharashtra | 09/12/2021 - Present

- Spearheaded a medical domain project for NYC Department of Health and Mental Hygiene, achieving an **85% reduction in page load times** via server-side pagination and lazy loading.
- Designed and implemented multiple modules for DBS, an international banking system, improving workflows across **MIS, Email, LCC, TMRAC, and Overdue management**.
- Enhanced system reliability by introducing advanced error handling and optimizing database queries.
- Directed end-to-end project life-cycle activities, including **requirement gathering, design, API development**, and client support, ensuring seamless deployment.
- Recognized as a key contributor with '**Super Squad**' awards in **2022 and 2023** for exceptional performance.

✓ Support Engineer

CMS IT Services Private Limited

Nagpur, Maharashtra | 13/08/2020 To 20/10/2021

- Configured and maintained systems, ensuring consistent uptime and security.
- Collaborated with the IT team to implement system upgrades and security patches on remote desktops.
- Delivered prompt and effective technical support to ensure seamless operations.

✓ Training Developer (Internship)

ICEICO Technologies Pvt

Nagpur, Maharashtra | 2/05/2019 To 27/07/2019

- Developed and enhanced web applications using Angular and Node.js, gaining practical exposure to full-stack development.

Technical Skills

- **Front End Development** : HTML5, CSS3, JavaScript, Typescript, Angular (6 & 14), jQuery, Angular Material, Bootstrap, ES-6/7/8, React js (Basic).
- **Back End Development** : Node.js, Express.js.
- **Programming Languages**: C, C++.
- **Database Management**: MS SQL Server, MySQL, MariaDB.
- **Web Services**: JSON, AJAX, REST, Postman.
- **Version Control & Tools**: Git, Bitbucket, JIRA.
- **Development Tools**: Visual Studio (2019/2022), Visual Studio Code, Ulpath Studio.
- **Reporting Tool**: SSRS.

Agile Methodology

Projects

✓ PDF Utility Project

Mumbai

Responsibility / Technology

01/2025 - Present

- Designed and developed a **desktop application** using **Node.js 14** to optimize and automate PDF utility processes.
- Created a utility to dynamically generate PDF letters from system data, significantly reducing manual effort and time.
- Implemented an automated process for compressing PDFs into password-protected zip files for secure storage and sharing.
- Developed file reading and letter-type-based PDF creation features, enhancing the user experience with a seamless and intuitive interface.
- Ensured scalability, maintainability, and a smooth user experience by handling end-to-end development and deployment.
- Focused on scalability and maintainability, providing a reliable utility with easy deployment.

✓ On-boarding Project

Mumbai

Responsibility / Technology

07/2024 - 12/2024

- Led the end-to-end development of the On-boarding application, including front-end, back-end, and database integration.
- Utilized **Angular 14**, **Node.js 20**, **Git**, and **MariaDB** to build a robust and scalable application architecture.
- Implemented **Optical Character Recognition (OCR)** for PAN and Aadhaar card processing, enabling efficient extraction and validation of user data.
- Independently developed and deployed the application, ensuring scalability, security, and a seamless user experience.
- Integrated real-time data validation and user authentication modules to enhance accuracy and security.
- Developed RESTful APIs and optimized performance, ensuring efficient communication between front-end and back-end systems.
- Maintained version control with **Git**, enabling efficient collaboration and documentation.

✓ Healthy Homes Quest Project

Mumbai

Responsibility / Technology

06/2023 - 07/2024

- Contributed to front-end and database development, leveraging **Angular 14** and **MySQL** to build a scalable and responsive web application.
- Applied expertise in web development technologies to ensure smooth project execution and successful deployment.

✓ DBS Bank Project

Mumbai

Responsibility / Technology

12/2021 – 06/2023

- Worked on DBS Bank's internal banking system, supporting modules like Email, LCC, Cash-ops, and MIS.
- Led requirements gathering and documentation to ensure alignment with project objectives and stakeholders.
- Designed, planned, and estimated project timelines and resources using Agile methodologies.
- Developed web services, APIs, and integrated front-end and back-end systems for efficient functionality.
- Played a key role in the successful deployment and ongoing client support for the LCC and MIS modules.
- Developed secure RESTful APIs, ensuring smooth and secure data flow between front-end and back-end.
- Utilized **Angular 6**, **Node.js**, and **MariaDB** for seamless implementation and deployment.

✓ ICEICO TALENTCARE

Nagpur

Responsibility / Technology

05/2019 – 07/2019

- Developed a web application for Talent-care, utilizing **Angular** for front-end development and **Node.js** for back-end functionality.
- Focused on creating a seamless and intuitive user experience for managing talent data.

✓ Design and Development of IoT Based Smart Pet Feeder

Nagpur

Responsibility / Technology

01/2020

- Developed an **IoT**-based project to automate pet care by providing water and food to pets remotely.
- Integrated sensors and automation to ensure pets receive proper nourishment and hydration without human intervention.

✓ Be Saved – Woman Safety Device

Nagpur

Responsibility / Technology

05/2019

- Created an **IoT**-based woman safety device using Arduino software and IoT technology.
- Developed the device to provide safety and emergency alerts in case of distress, enhancing security for women in vulnerable situations.

Education

2020	BE (Computer Science & Engineering) - SBJITMR
2016	HSC - L.B.H. jr. college, Kondhali
2014	SSC - Trimurti Vidyalaya Dudhala

*SBJITMR - S. B. Jain Institute of technology, Management and Research, Nagpur
